HealthTec^{dl}

Distance Learning for Health Nonprofits and the Health Workforce

HealthTec^{dl} is a statewide distance learning program designed to support health professionals and strengthen services provided by nonprofit health organizations in Georgia. The program offers both live and on demand programming for nonprofit health organizations and health professionals. Most programs are offered at no cost to participants, and many offer CE/CME credits.

Established in 2007 by Healthcare Georgia Foundation, HealthTec^{dl} utilizes health information technology to deliver programs in support of nonprofit health organizations that drive positive change in their communities, promote programs which improve health and healthcare for Georgia residents, and connect people, programs, and resources across our state. The program is funded and directed by Healthcare Georgia Foundation.

The goals of the distance learning program are to:

- Promote capacity building among nonprofit health organizations
- Strengthen Georgia's health professions workforce
- Foster collaboration among public and private nonprofit and for profit health organizations.
- Improve access to affordable high quality health and health care services
- Inform policy decisions and resource allocations

Programming: Live and on demand programming is available at www.healthtecdl.org.
